Art Unit: 1614

Applicant elected the regimen for preventing epithelioid ovarian cancer wherein the agent is progestin product with traverse in Paper No. 6. Applicant's remarks are noted but the other agents will support separate patents.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,028,064. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims is directed to a regimen generically for preventing ovarian cancer while the patent claims is directed to a specific regimen (see claims 5-9). Both the patent claim and instant claim are directed to the agent, progestin product.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specific agent based on its ability to up[↑]regulate TGF-BETA expression in the ovarian epithelium disclosed, does not reasonably provide enablement for the term "agent based on its ... epithelium[↘]". The specification does not enable any person skilled in the art to which

Art Unit: 1614

it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The term "agent ... epithelium" in claim 1 lacks clear exemplary support in the specification as filed.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "a regimen" in claim 1 and 2 is indefinite in failing to recite the specific regime. Moreover, the amounts and specific host is needed.
